

# Rhino TriView<sup>®</sup> Sign

US Patent #6099203 & 7025016 & D525721 & pending patents

Rhino TriView Signs work great in situations when you cannot bury a sign, but need a highly visible marker that is 3D and has a message on all sides. The TriView Sign can be affixed to a fence, tree, building, or to an existing wood sign.

### Temperature and Ultraviolet Light Stable

Made from RhinoPoly, the TriView Sign was specifically designed as an outdoor marker for marking trails and for notifying people of private property lines. This versatile sign has ultraviolet light stabilizers that will keep the bright color of the sign from fading in the sun. The TriView Sign is also temperature stable from -40 degrees Fahrenheit to +150 degrees Fahrenheit.

### Colors

Standard sign colors are yellow, white, orange, blue, green, red, purple and brown. Standard cap color is black. Optional cap colors are red, yellow, blue, orange and white. Custom colors are available for both signs and caps. Call for details.

### Lengths

Standard sizes are 8", 18", 24" and 36".

### Decals

TriView Signs can serve as trail or mile markers for hikers or can be used as warning messages. They can also be used for trail specifications such as no dog signs, rocky trail ahead signs, etc.
