

The highly visible Rhino TriView's triangular design ensures that your warning message can be seen from any direction.

Product Integrity

The Rhino TriView is so durable and flexible that it can withstand repeated vehicle impacts up to 50 MPH and still snap back to its original upright position. The versatile post has ultraviolet light stabilizers that keep the bright color of the post from fading in the sun. The Rhino TriView is temperature stable from -40 degrees Fahrenheit to +150 degrees.

TriView Road Closure Chain Marker

Make sure drivers, snowmobilers, etc., see your road closure chain. The TriView Road Closure Marker also lets everyone know that no trespassing is allowed.

3" Reflective band makes the TriView visible at night.

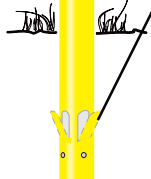

Hundreds of stock decals are available as well as any custom decal you need.

Visitor, Reserved, & Handicapped decals can be used to identify specific parking spaces.

TriViews can be buried to create a flexible marker post that will bend over & snap up if hit by a vehicle.

TriView Anchor System prevents pull out.

TriView™ Soil Anchor eliminates the need to dig a hole & allows you to swap out posts on multi-use trails.
